

De Figuranten is an art-organisation located in Menen. We do research, create and present artistic work in dialogue with the most vulnerable people in society: theatre, dance, fine arts, photography, video,... Our mission is to unite (guest)artists and people with a social vulnerability in a way which is interesting for both parties and leads to high quality artistic work.

Next to our regular activities, we want to share our workspace and give (young) artists the opportunity to research, create and present in our studio in Menen. We are also looking forward to meet new artists with a possible co-operation in the future in mind.
