

## Residency in the workshop of De Figuranten

De Figuranten is an art organization that creates artistic work together with people in a vulnerable position: theatre, visual work, video, text... In our workspace in Menen, we organize weekly open studios: a theatre studio for adults, for young people, writing workshops,... in which we work on a performance for one of our festivals, Winterwerk in December and Mad World in May. In addition, we co-operate with partners (psychiatry, schools) on artistic projects tailored to their needs, often with guest directors.

Due to the nature of our work and projects, our workspace is often completely or partially free during the summer months. We are happy to open our studio to artists who need a work or rehearsal space. We look forward to meet other artists.
